ANSWER TO OPPOSITION

TAKE NOTICE that the Registrar is in receipt of an answer to opposition filed by WAL-MART STORES INC. (The Applicant), of 702 S.W. 8th Street, Bentonville, Arkansas 72716-0520, United States of America, by EVEREADY BATTERY COMPANY, INC. (The Opponent), of 533 Maryville University Drive, St. Louis, Missouri 63141, United States of America, on the 21st day of October, 2005, against trade mark application No. 3186.05, filed on the 8th day of July, 2005 by WAL-MART STORES INC. (The Applicant), for the registration of the following trade mark, as proprietors thereof:

EVEREADY

The Applicant hereby gives notice that the following are the grounds on which it relies as supporting the above trademark-

1. the mark of the Applicant is not similar to the Opponent's mark;
2. the only common feature between the Applicant's mark and that of the Opponent's is the use of the prefix "EVER". Save and except this prefix, there is no similarity between the Applicant's mark and the Opponent's mark;
3. registration of the EVEREADY trademark did not, at the time of registration, and does not presently confer on the registered proprietor thereof the exclusive right to the use of the prefix "EVER";
4. the Applicant's trademark has gained international recognition and is registered in several countries throughout the world;
5. the Applicant filed for the registration of two (2) EVERACTIVE trademarks in the United States of America identical to the one for which registration is sought in Belize, on July 28, 1999 and September 11, 2000. These marks were registered in the United States of America on July 3, 2001 and February 25, 2003;
6. both the Applicant's mark and the Opponent's mark are registered and currently co-exist for the relevant goods on the trademark registry in the United States of America;
7. there is no likelihood of confusion between the Applicant's mark and the Opponent's mark which may mislead the public into thinking that the marks are associated and owned by the same company;

8. there is no likelihood of passing off of one mark for the other which would lead the public to believe that the goods offered by the Applicant are the goods of the Opponent:
 - a. the Applicant does not by the use of its mark make a representation to the public, whether intentionally or not, which would lead or is likely to lead the public to believe that the goods offered by the Applicant are the goods of the Opponent;
 - b. the Applicant's products are very well and explicitly labeled and it is highly unlikely that the public would believe that the Applicant's goods are those of the Opponent;
 - c. the Applicant's use of its mark or the registration thereof is not calculated to injure the business or goodwill of the Opponent;
 - d. the Applicant's use of its mark will not cause any loss or damage to the business or goodwill of the Opponent;
 - e. the Opponent will not suffer any loss or damage to its business or goodwill due to any erroneous belief that the Applicant's goods or use of the mark are the goods or mark of the Opponent.
9. the Applicant's mark has been in use by the Applicant since 1999. It has acquired sufficient distinctiveness and a reputation in the marketplace;
10. the Applicant does not admit that there is a distinctive character or repute of the Opponent's mark so as to prevent the registration of the Applicant's mark.
11. in the event that there is a distinctive character or repute of the Opponent's mark, the use of the Applicant's mark has not taken advantage of and has not been of detriment to the distinctive character or repute of the Opponent's mark and will not take advantage of or be of detriment to such character or repute.

UTILITY PATENT	
Application Number: 400.05 Filing Date: November 4, 2005	Applicant(s): James Donald Fauble, 13980 Lago Azul St., Horizon city, Texas 79928, U.S.A. Inventor(s): James Donald Fauble, 13980 Lago Azul St., Horizon city, Texas 79928, U.S.A.
Title: "HOPE GENERATOR" (Harmonic Oscillating Power Electric Generator)	
Abstract: A solid state electrical generator which may employ sound or various other resonant frequencies to induce and produce AC potential. One embodiment of the present invention consists primarily of a central C-Core (1a) made from METGLAS ALLOY 2605SA1, four primary induction wire coils consisting of a pair or set of first stage (2a) and second stage (2b) primary coils, and two output coils (2c). The four primary coils are situated around each of the four end posts located on each of the two halves of the C-core (1a) where they fit together to form one complete core. The two output coils (2c) are situated along the valley (or) center of the U shape located on each half of the C-core (1a). All coils are typically wound from left to right in a clockwise fashion, however coils wound from right to left will simply require modifying the way in which jumper wires will be configured and/or connected. Additional coils can also be added to the exterior of the HOPE Generator to collect and relay additional current either back into the unit or to be used for entirely other purposes altogether.
